🐉 RED DRAGON'S VAULT | COMMANDER CONTROL CENTRE — USER GUIDE

1. Startup, Session Recovery & Format Selection

Automatic Crash & Session Recovery

Every action you take automatically saves tournament state to `rdvccc_state.json` in the application directory. If the computer restarts or the program is closed mid-event, launching the app displays the **Session Recovery** prompt:

- **Resume Saved Event** Restores all registered players, payment statuses, table locks, active pods, scores, and round history.
- **Start New Event** Clears previous tournament data and starts fresh in the **Registration Phase**.

Choosing Your Tournament Format

Before starting Round 1, choose your format using the toggle on the top toolbar:

- **Standard Commander Pods (👥 2HG Mode: OFF):** Places players into 4-player Commander pods (automatically creating 3-player fallback pods when needed, or a single 5-player pod if exactly 5 players register).
- **Two-Headed Giant (👥 2HG Mode: ON):** Pairs teams of 2 into head-to-head (2v2) table matches and enables the **Team #** column on the Player Manager.

Built-in Demo Modes (For Testing & Training)

- **Demo 1** Loads 36 sample players (including RDV-tagged staff) into the Registration Phase.
- **Demo 2 (Post-Event)** Simulates all 3 rounds and jumps straight to the finalized **Prizing & Wheel** tab.
- **Demo 3 (2HG Ready)** Enables 2HG Mode, loads 36 players, and pairs them into 18 teams ready for Round 1.

2. Player Registration & Management (👨‍💼 Player Manager)

Registering Players

1. Click the **Register Player(s)** text box on the top toolbar.
2. Type a single player name or a comma-separated list of names (e.g., `Alice Smith, Bob Jones, Charlie Brown*`).
3. Press `Enter` or click **+ Add**.

> ★ **Auto-Tagging Staff (RDV Tag):** Append `*`, `RDV`, or `(RDV)` to a name during registration (e.g., `Eve Adams*` or `Eve Adams (RDV)`) to automatically tag them as **[RDV]**. RDV-tagged players are automatically marked as **Paid** and are excluded from the Top 3 Podium and Random Prize Wheel.

Multi-Selection & Column Sorting

- **Single Click:** Selects an individual player row.
- `Ctrl + Click` Toggles individual players in or out of your current selection.
- `Shift + Click` Selects a continuous range of players between two rows.
- `Ctrl + A` Selects all players in the list.
- **Sorting Columns:** Click any column header (`PAYMENT`, `PLAYER NAME`, `TEAM #`, `STATUS`, `POINTS`, `OPP PTS (TB)`, `W - L - D`) to sort ascending or descending.

Player Manager Controls & Right-Click Actions

BUTTON	SHORTCUT / TRIGGER	DESCRIPTION
✓ Mark Paid	Double-click row, Toolbar button, or Right-click	Toggles between ✓ **Paid** and ⏳ **Unpaid**. Works in bulk when multiple players are selected.
+ Late Player	Toolbar button	Registers a late-arriving player after Round 1 has started so they are included in the next round.
✎ Edit Name	Toolbar button or Right-click	Renames a single selected player and updates their name across all active pods, teams, and historical rounds.

BUTTON	SHORTCUT / TRIGGER	DESCRIPTION
🔒 Lock Table	Toolbar button or Right-click	Locks selected player(s) (and their 2HG partner) to a specific table number (e.g., `1` for Table 1). Enter `0` or leave blank to clear the lock.
★ RDV Tag	Toolbar button or Right-click	Toggles `[RDV]` status on selected player(s) and automatically marks them Paid. RDV marked players are ineligible for prizing places on the podium or prize wheel
⚔ Drop Player	Toolbar button or Right-click	Marks selected player(s) as **Dropped**. Their points remain valid for previous opponents' tiebreakers, but they will not be seated in future rounds.

3. Two-Headed Giant Team Builder (👥 Manage Teams)

When 👥 2HG Mode: ON is active, the 👥 Manage Teams button appears on the **Player Manager** tab.

1. Click 👥 Manage Teams to open the **Two-Headed Giant Team Builder** window.
2. In the top **Available Unassigned Players** grid, click the first player (their button highlights blue with a ✓), then click their partner to form a 2HG team.
3. **Table Lock Inheritance:** If either player already has a table lock, the entire team automatically inherits that table lock.
4. **Splitting a Team:** During registration (before Round 1 starts), click Split Team next to any created team to return both players to the available pool. Splitting a team automatically clears any table locks from both players.

4. Running Rounds & Managing Pods (🌽 Active Pods)

Starting & Advancing Rounds

- Click ▶ Start Round 1 (Random) on the top-right toolbar to generate Round 1 pairings.
  - **Round 1:** Randomly seats unlocked players/teams while anchoring any 🔒 Lock Table players/teams to their assigned table numbers.
  - **Rounds 2 & 3 (Swiss):** Sorts active players/teams by **Points** and **Opponent Points (Tiebreaker)**, then optimizes pods to avoid repeat opponents while keeping locked players at their fixed tables.
- ↻ Re-Pod Round Reshuffles the current round's pairings (available before match results are recorded for the round).
- 📺 Show TV Pairings Opens a maximized, high-contrast pairings window for a secondary TV or projector screen. It updates live whenever seats are swapped or results are recorded.

Manual Pod Adjustments (Swap & Move)

While a table is marked ● **IN PROGRESS**, you can manually adjust seating:

- **Swap (↔):** Click ↔ next to the first player or 2HG team (it highlights blue as ✓ ↔), then click ↔ on a player or team at another table to swap their places.
- **Move (M):** Click M to open a dialog and move that player or team to another incomplete table (or to a **New Table** in 2HG mode).

> ★ **2HG Automatic Bye Pod:** If there is an odd number of active teams in 2HG mode, one team is placed into the ★ **BYE POD** panel and automatically awarded **+3 points** (+1 win). You can still use the Swap (↔) button on the Bye Pod to swap another team into the Bye slot—the 3 points automatically transfer to the newly swapped Bye team.

Recording Match Results

- **Player / Team Win:** Click Won (+3) next to the winner to award **+3 points** (+1 Win) to the winner and log a Loss for opponents.
- **Pod / Match Draw:** Click 🤝 Record Pod/Match Draw (+1 pt) at the bottom of the card to award **+1 point** (+1 Draw) to all participants at that table.
- **Correcting Results (↺ Undo):** On any completed table card, click ↺ Undo to revert the points and re-open the table.

5. Prizing, Standings & TV Wheel (🏆 Prizing & Wheel)

Once all tables in Round 3 have results recorded, the tournament finalizes and unlocks the prizing controls.

Top 3 Podium & Full Final Standings

- **Top 3 Podium Cards:** Automatically displays the **1st Place**, **2nd Place**, and **3rd Place** eligible players or 2HG teams based on Points and Opponent Points (Tiebreaker), automatically skipping any `[RDV]` staff tags.
- 🏆 View Full Final Standings Opens a maximized leaderboard displaying Rank, Player/Team Name, Points, Opponent Points (Tiebreaker), and W-L-D record for everyone in the event.

Running the Synchronized TV Wheel

The Prize Wheel automatically includes all active, non-`[RDV]` players or teams who did **not** finish in the Top 3 Podium.

1. Click 📺 TV Wheel to launch the 1080p-scaled, view-only Podium and Prize Wheel window on your secondary TV or projector screen.
2. In the main control window, click 🎰 SPIN PRIZE WHEEL.
3. Both the control wheel and the **TV Wheel** spin in sync for 7 seconds, pause on the winning slot, and display a celebratory winner banner for 5 seconds.
4. Each winner is recorded under **Last Winner** and removed from the wheel pool so they cannot be drawn twice. Click 🎰 SPIN AGAIN for additional door prizes.

6. Night's Matchups & Plain-Text Export (📋 Matchups & Winners)

Viewing All Matchups & Winners

Click **📋 Matchups & Winners** on the **Prizing & Wheel** tab at any point during or after the tournament to open a multi-column summary showing every table matchup and winner from **Round 1**, **Round 2**, and **Round 3**.

Exporting the Night's Report to Plain Text (`.txt`)

1. Open the **📋 Matchups & Winners** window.
2. Click **📄 Export to Text (.txt)** in the top-right corner of the window.
3. The Save dialog automatically pre-fills the filename as `Commander FNM ddmmyyyy.txt` (using today's date, e.g., `Commander FNM 28102026.txt`).
4. Click **Save** to write a clean, formatted plain-text report containing:
   - Event header, date, and format (Commander Pods or 2HG).
   - Every round's table matchups, winners, draws, and byes.
   - Complete ranked standings with Points, Opponent Points, and W-L-D records.
   - All Random Prize Wheel winners drawn that night.
